FS - CPI
DC - B05 B07 D13 D21 E11
AB - J01016890 Antioxidant for foods, medicines, cosmetics,
etc. comprises a glycerol phosphate derivative. The
glycerol phosphate salt is e.g., Na-, K-, Li-, Zn-,
Mg-, Ca-, aminomethylpropanol, aminomethylpropane diol,
isopropanolamine-, monoethanolamine-, diethanolamine-,
triethanolamine-, morpholine-, lysine-, arginine- or
ornithine- glycerol-1-, -2- or -3-phosphate. Pref.
deriv. is e.g., glycerol phosphoryl ethanol amine,
glycerol phosphoryl serine, glycerolphosphoryl choline
or glycerol phosphoryl glycerol. It is added to various
prods. in amt. 0.001-5 wt.%.
- USE/ADVANTAGE - Controls decrease in the pH of a prod.
blended with the antioxidant, the liberation of the
prod., deterioration of odour from the prod. and has
high and durable stability. Used for controlling the
oxidn. of cosmetics, medicines, foods, etc.
